# STORM

## V2 NAVIGATOR

### FEATURES

Special Edition, dual time, date, compass, thermometer, splash resistant.

### DUAL TIME

Both analogue mechanisms work independently and use separate batteries.

### SETTING THE DATE (left mechanism)

Pull the crown out to position 1.  
Turn the crown anti-clockwise to advance the date.

Press crown back in fully

Note: The date needs to be manually re-set at the start of each month

### SETTING THE TIME (both mechanisms)

Pull the crown out to position 2.

Turn clockwise to advance to the correct time.

Press crown back in fully.

Note: Passing through 12am will advance the date on the main mechanism.

### THE COMPASS FEATURE

The watch case must be held flat and not tilted or held upright.

The compass is a design feature and not a highly accurate instrument. Accuracy will be affected by external surroundings

### THERMOMETER FEATURE

Measures atmospheric temperature in degrees centigrade.

The Thermometer is a design feature and not a highly accurate instrument. It gives an indication of the average temperature reading slowly over a period of time. It does not give an instant temperature change reading.
